

WHAT IS CLAIMED:

1. A print driver user interface method for printing a document, comprising:

receiving a number corresponding to a number of copies to be printed from an application;

receiving at least one command relating to an operation to be performed on each of the number of copies to be printed;

displaying a first feature to a user;

offering the user a choice relating to printing copies of the document;

transferring control of printing the number of copies from the application to the print driver.

2. The method of **claim 1**, wherein said offering includes permitting the user to select a second number of copies to be printed.

3. The method of **claim 2**, wherein said offering includes permitting the user to select to transfer control of printing the copies from the application to the print driver.

4. The method of **claim 3**, wherein said permitting the user to select to transfer control includes permitting the user to select there is a problem printing multiple copies.

5. The method of **claim 1** wherein the first feature informs the user that the application may have a problem printing multiple copies

6. The method of **claim 1** further comprising offering the user to select the operation to be performed.

7. The method of **claim 1** wherein the operation to be performed was selected by the user in the application.

8. The method of **claim 1**, further comprising displaying a second feature to the user that explains the purpose and function of transferring control of printing the copies from the application to the print driver.

9. The method of **claim 1**, further comprising reporting to the application that one copy will be printed.

10. A print driver UI method for printing copies of a document, comprising:

receiving a number corresponding to the number of copies to be printed from an application;

receiving at least one command relating to an operation to be performed on each of the number of copies to be printed;

displaying a feature to a user informing the user that the application may have a problem printing multiple copies.

11. The method of **claim 10** further comprising offering the user to select the operation to be performed.

12. The method of **claim 10** wherein the operation to be performed was selected by the user in the application.

13. The method of **claim 10** wherein the operation to be performed is duplexing.

14. The method of **claim 10** wherein the operation to be performed is stapling.

15. The method of **claim 10** wherein the feature also instructs the user on how to access the print driver UI.

16. A print driver UI method for printing copies of a document, comprising:

offering the user a choice relating to printing copies of a document;
transferring control of printing the copies from the application to the print driver;

reporting to the application that one copy will be printed..

17. The method of **claim 16**, wherein offering the user a choice includes offering the user to select a second number of copies to be printed.

18. The method of **claim 17**, wherein offering the user a choice includes offering the user to select to transfer control of printing the copies from the application to the print driver.

19. The method of **claim 18**, wherein offering the user to select to transfer control includes offering the user to select there is a problem printing multiple copies.

20. The method of **claim 16**, further comprising displaying a feature to the user that explains the purpose and function of transferring control of printing the copies from the application to the print driver.

21. A print driver UI method for printing copies of a document, comprising:

- receiving a number corresponding to the number of copies to be printed from an application;

- receiving at least one command relating to one of stapling or duplexing being performed on each of the number of copies to be printed;

- displaying a first feature to a user that informs the user that the application may have a problem printing multiple copies and instructs the user on how to access the print driver UI;

 - offering the user to select a second number of copies to be printed;

 - offering the user to select there is a problem printing multiple copies

- transferring control of printing the copies from the application to the print driver

- displaying a second feature to the user that explains the purpose and function of transferring control of printing the copies from the application to the print driver

 - reporting to the application that one copy will be printed.
